Grade 10 (Year 11) | Phase 4 / Cycle 3 | AI Systems & Solutions Designer

Main Course, Term 1 - AI as Integrated Solutions - Systems Thinking

Emerging tier | 10 weeks (Core + Lab)

Week 1 - Core - Worksheet | Unit Launch · Systems Thinking - See the Whole System

Strand Self-Check

- **Rate yourself against this week's success criteria: Can do / Partially / Not yet. What would you practise to move up a level?**

Can do ☐ Partially ☐ Not yet ☐ To practise:

_____

Name: _____ **Class:** _____ **Date:** _____

Scenario: the bilingual service desk turns an Arabic voice note into an English summary for staff and a spoken Arabic reply.

1. Sort each example your teacher shows into single-tool or integrated multi-tool. For each multi-tool example, write which tool's output feeds the next tool.

Example	Single or multi-tool?	Which output feeds the next tool?

2. Map the service-desk pipeline. Write the tool at each stage, then mark the hand-off you think is most likely to carry an error.

1 · Input	→	2 · Tool	→	3 · Tool	→	4 · Output
	→		→		→	

_____

_____

3. Write two clear questions about how different AI tools can be combined to solve a bigger problem.

_____

_____

4. My reflection: one question I still have about combining AI tools is...

_____

_____
